

Archives — Onboarding Flow Spec

AFF-844 · PostHog Project 93650 · Generated 2026-04-30

- ☐ **Normal** — event exists in codebase
- ☐ **Red** — not in codebase, needs implementation
- ☐ **Grey** — in codebase, not wired in new flow
- ☐ **Blue** — checkpoint
- ☐ **Dark Grey** — alternate path (diagram)

User Journey

Events

#	Node	PostHog Events	QA
1	App Opened	app_entry_point screen, is_signed_in, is_loaded auth_state_change previous_state, new_state, user_id, app_state	Blank/frozen splash screen; routing guard loops
2	Welcome Back	welcome_back_viewed remembered_method (apple / google / email) welcome_back_tapped	Avatar not loading; one-tap auth fails silently

#	Node	PostHog Events	QA
		action (continue_as / sign_out)	
3	Hero Screen	onboarding_step_viewed screen: hero	Video background not playing; CTA not visible; LET'S START button unresponsive
4	Meet Ibu	onboarding_step_viewed screen: meet_ibu onboarding_login_shortcut_tapped screen: meet_ibu, destination: create_account	Rive animation fails to load; typewriter stalls; CONTINUE button unresponsive; "Already have an account?" link unresponsive
5	Name Input	onboarding_step_viewed screen: name_input onboarding_name_entered name_length onboarding_skipped screen: name_input, action: skip, destination: create_account onboarding_back_tapped screen: name_input	Keyboard covers input; CONTINUE stays disabled; Skip link unresponsive; back button doesn't navigate
6	Welcome Celebration	onboarding_step_viewed screen: welcome_celebration	Auto-advance timer doesn't fire; blank screen; tap-to-skip unresponsive
7	Interests Selection	onboarding_step_viewed screen: interests onboarding_interests_selected interests: string[], count: number onboarding_skipped screen: interests, action: skip, destination: create_account onboarding_back_tapped screen: interests	Options unresponsive; selection state not persisting; CONTINUE button unresponsive; Skip link unresponsive

#	Node	PostHog Events	QA
8	Social Proof	onboarding_step_viewed screen: social_proof onboarding_back_tapped screen: social_proof	Reviews not rendering; scroll broken; CONTINUE button unresponsive; back button doesn't navigate
9	Create Account	onboarding_step_viewed screen: create_account auth_method_selected method (apple / google / email), screen auth_succeeded method, is_new_user, screen auth_failed method, error_message, screen user_signed_up sign_up_method user_session_in login_method onboarding_back_tapped screen: create_account	OAuth popup dismissed; email validation fails; spinner hangs; auth buttons unresponsive; back button doesn't navigate
10	Email Auth Form	auth_screen_viewed screen: onboarding_auth, mode (signin / signup) trackAuthScreenViewed() exists in AnalyticsService — needs wiring in onboarding-auth.tsx user_signed_up sign_up_method: email user_session_in login_method: email	Validation errors not shown; Clerk timeout; CONTINUE button unresponsive; back button doesn't navigate

#	Node	PostHog Events	QA
		onboarding_back_tapped screen: email_auth	
11	Post-Signup Celebration	onboarding_step_viewed screen: post_signup_celebration	Screen flash; mascot image missing; CONTINUE button unresponsive; Maybe later link unresponsive Note: "Maybe later" and CONTINUE both route to Notification Permission — no distinct skip action here
12	Notification Permission	permission_requested permission_type: push_notifications, screen, result, platform push_notifications_enabled permission_type, screen, result, platform push_notifications_declined permission_type, screen, result, platform onboarding_back_tapped screen: notification_permission	OS permission dialog doesn't appear (Expo Go); granted but token not registered; ENABLE button unresponsive; Maybe later link unresponsive Note: "Maybe later" fires permission_requested with result: undetermined — both paths (enable + maybe later) route to Daily Goal. No header Skip button on this screen.
13	Daily Goal	onboarding_step_viewed screen: daily_goal onboarding_daily_goal_selected daily_goal_minutes: 5 10 15 20 onboarding_skipped screen: daily_goal, action: skip, destination: loading onboarding_back_tapped screen: daily_goal	Options don't highlight on tap; value not saved to store; CONTINUE button unresponsive; Skip link unresponsive Note: Skip calls markSkipped() and jumps to Loading screen
14	Age Group	onboarding_step_viewed screen: age_group onboarding_age_group_selected age_group: 13-17 18-24 25-34 35-44 45+	Options don't highlight; CONTINUE button unresponsive; Skip link unresponsive; back button doesn't navigate Note: Same Skip as Daily Goal — shared header Skip button, jumps to Loading screen. Back from Age Group returns to Daily

#	Node	PostHog Events	QA
		onboarding_skipped screen: age_group, action: skip, destination: loading onboarding_back_tapped screen: age_group	Goal (same screen, phase switch).
15	Loading	onboarding_step_viewed screen: loading	Rive animation fails to load; auto-advance timer doesn't fire; stuck on loading screen Note: Auto-advance screen (~9s). No back button, no skip, no user interaction. Cycles through 3 loading messages then auto-navigates to Learning Path Overview.
16	Learning Path Overview	onboarding_step_viewed screen: learning_path onboarding_completed time_to_complete_seconds, onboarding_q1 (interests), onboarding_q2 (daily_goal), onboarding_q3 (age_group), onboarding_q4 (name) trackOnboardingCompleted() exists in AnalyticsService — not wired in new flow. Only called from dead legacy flow. onboarding_back_tapped screen: learning_path	GET STARTED doesn't fire markCompleted(); blank week cards; GET STARTED button unresponsive; back button doesn't navigate
17	Soft Paywall	paywall_viewed screen: onboarding_paywall, source: onboarding sign_in paywall_cta_tapped action: see_free_offer onboarding_back_tapped screen: soft_paywall	CTA doesn't navigate; paywall-seen flag not persisted; SEE MY FREE OFFER button unresponsive; back button doesn't navigate

#	Node	PostHog Events	QA
18	Custom Paywall	custom_paywall_viewed screen: onboarding_custom_paywall, source: onboarding sign_in custom_paywall_plan_selected plan: monthly yearly lifetime custom_paywall_subscribe_tapped plan: monthly yearly lifetime custom_paywall_subscribe_success plan, transaction_id custom_paywall_subscribe_failed plan, error custom_paywall_dismissed screen: onboarding_custom_paywall, action: dismiss back	Plans not loading; subscribe button unresponsive; purchase flow hangs; dismiss doesn't navigate; RevenueCat error not surfaced
19	Main App	app_opened PostHog auto-capture	Blank Today tab; providers not initialized
Global events tracked across all onboarding screens			
Event		Properties	Status
onboarding_back_tapped		screen (name of current screen)	Needs implementation on every screen with a back button
onboarding_skipped		screen, action (skip maybe_later)	Needs implementation on screens with Skip / Maybe later
onboarding_app_backgrounded		screen (name of current screen), time_on_screen_seconds	Needed to distinguish app-background from true drop-off

Event	Properties	Status
onboarding_app_foregrounded	screen (name of current screen), time_away_seconds	Needed to stitch resumed sessions — user came back

Questions This Flow Answers

1. Strategic Questions

1. Where is the major drop-off in the onboarding funnel?
2. How many users tap the back button at least once during onboarding?
3. Which screen has the highest back-button rate?
4. How many users background the app during onboarding and never come back?
5. How many users background the app but return and finish onboarding?
6. How long does the average user take to complete the full onboarding?
7. How many users skip one or more personalization screens?
8. How many users complete all personalization screens?

2. Behavioral Insights

1. How many users see the Hero Screen?
2. How many users select at least one interest at the Interests Selection screen?
3. How many users reach the Create Account screen?
4. How many users successfully sign up (new account created)?
5. How many users sign in with an existing account instead of signing up?
6. How many users choose Apple as their auth method?

7. How many users choose Google as their auth method?
8. How many users choose Email as their auth method?
9. How many users fail authentication (and what errors do they hit)?
10. How many users enable push notifications at the Notification Permission screen?
11. How many users decline push notifications?
12. How many users tap "Maybe later" on notifications?
13. How many users select each daily learning goal option (5 / 10 / 15 / 20 min)?
14. How many users are in each age group (13-17 / 18-24 / 25-34 / 35-44 / 45+)?
15. How many users complete the full onboarding (tap GET STARTED at Learning Path Overview)?
16. How many users see the Soft Paywall?
17. How many users tap "See my free offer" on the Soft Paywall?
18. How many users see the Custom Paywall?
19. How many users select a subscription plan on the Custom Paywall?
20. How many users successfully subscribe during onboarding?
21. How many users dismiss the Custom Paywall without subscribing?
22. How many returning users land on the Welcome Back screen?
23. How many returning users re-authenticate via one-tap on Welcome Back?

3. Checkpoint Validation

1. **App Opened** — How many users reach the routing guard?
2. **Hero Screen** — How many users see the first onboarding screen?
3. **Name Input** — How many users reach the name input screen?
4. **Interests Selection** — How many users select interests and continue?
5. **Create Account** — How many users reach the auth screen?

6. **Notification Permission** — How many users reach the notification prompt?
7. **Learning Path Overview** — How many users see their personalized path and tap GET STARTED?
8. **Soft Paywall** — How many users see the soft paywall?
9. **Custom Paywall** — How many users see the subscription plans?
10. **Main App** — How many users land in the main app after onboarding?

Analysis Notes

- **Exclude skips from drop-off:** Users who tap Skip or Maybe later are intentional — they should not count as drop-offs. Filter by `onboarding_skipped` events when calculating funnel conversion rates.
- **Exclude backgrounded sessions:** A user backgrounding the app is not a drop-off. Use `onboarding_app_backgrounded` / `onboarding_app_foregrounded` to stitch sessions. Only count a user as dropped if they never return.
- **Back-button navigation ≠ drop-off:** Users going back to change an answer should be tracked via `onboarding_back_tapped` but not counted as abandonment.
