

Archives — Profile Flow Spec

AFF-844 · PostHog Project 93650 · Generated 2026-04-30

- ☐ **Normal** — event exists in codebase and is wired
- ☐ **Red** — not in codebase, needs implementation
- ☐ **Grey** — method exists in AnalyticsService but not wired in component
- ☐ **Blue** — checkpoint (key milestone)
- ☐ **Dark Grey** — alternate / unimplemented path

User Journey

Diagram source: docs/analytics/specs/profile/profile.mmd

Events

#	Node	PostHog Events	QA
1	Profile Tab Viewed	page_view page_name: profile, time_spent_seconds, clicks Wired via useProfilePageView → startPageView('profile') on focus, endPageView('profile') on blur \$set (person properties) email, firstName, lastName, username Wired via useProfilePageView → setUserProperties() as fallback sync profile_tab_viewed screen: profile, total_xp, streak, longest_streak, lessons_completed, achievements_unlocked	Blank screen; avatar not loading; stats showing 0 for active user; scroll not working
2	Avatar Section	profile_avatar_tapped current_avatar_id, screen: profile	Avatar image not loading; breathe animation frozen; edit badge missing; tap does nothing (onOpenAvatarPicker is a no-op)

#	Node	PostHog Events	QA
3	Stat Grid	profile_stats_expanded screen: profile profile_stats_collapsed screen: profile	Count-up animation not running; "See more" / "Show less" toggle unresponsive; expanded stats showing wrong values; stat tiles overlapping
4	XP This Week Chart	profile_weekly_xp_viewed weekly_xp_total, screen: profile	Chart SVG not rendering; data points showing 0; animation stalled; incorrect day labels
5	Monthly Badges Preview	profile_badge_tapped badge_month, is_earned, screen: profile_preview profile_monthly_badges_screen_opened total_earned, total_badges: 12, screen: profile	Badge images not loading; grayscale filter broken; month pill not highlighting; "Open All" chevron unresponsive
6	Badge Detail Card	profile_badge_detail_viewed badge_month, badge_label, is_earned, screen: profile profile_badge_detail_dismissed badge_month, screen: profile	Modal not appearing; gradient background missing; locked/unlocked pill wrong state; close button unresponsive; backdrop tap not dismissing
7	Monthly Badges Screen	profile_monthly_badges_screen_viewed total_earned, screen: monthly_badges profile_badge_tapped badge_month, is_earned, screen: monthly_badges_full profile_monthly_badges_screen_closed screen: monthly_badges	FlatList blank; grid layout broken on smaller screens; back button unresponsive; detail card not opening from full grid
8	Achievements Preview	profile_achievement_tapped achievement_id, is_unlocked, screen: profile_preview	Achievement images not loading; grayscale filter broken on

#	Node	PostHog Events	QA
		profile_achievements_screen_opened total_unlocked, total_achievements: 20, screen: profile	Android; "Open All" chevron unresponsive; locked artwork showing colored version
9	Achievement Detail Card	profile_achievement_detail_viewed achievement_id, achievement_name, is_unlocked, screen: profile profile_achievement_detail_dismissed achievement_id, screen: profile	Modal not appearing; wrong locked/unlocked artwork; description text missing; unlocked date pill incorrect; close button unresponsive
10	Achievements Screen	profile_achievements_screen_viewed total_unlocked, total_achievements: 20, screen: achievements profile_achievement_tapped achievement_id, is_unlocked, screen: achievements_full profile_achievements_screen_closed screen: achievements	Grid blank; 20 tiles not rendering in 3-column layout; stagger animation frozen; back button unresponsive; detail card not opening
11	Learning Preferences	profile_learning_preferences_viewed daily_goal_minutes, screen: profile	Daily goal showing "Not set" for user who set it; layout broken
12	Settings Sheet	profile_settings_opened screen: profile profile_settings_closed screen: settings	Modal not appearing; sheet not sliding up; close button unresponsive; Android backdrop tap not dismissing; toggle rows not rendering
13	Toggle Background Music	profile_setting_toggled setting: background_music, new_value (true/false), screen: settings	Toggle switch unresponsive; preference not persisting after restart; music not stopping/starting

#	Node	PostHog Events	QA
14	Toggle Sound Effects	profile_setting_toggled setting: sound_effects, new_value (true/false), screen: settings	Toggle switch unresponsive; preference not persisting; quiz feedback sounds still playing when disabled
15	Toggle Vibration	profile_setting_toggled setting: haptics, new_value (true/false), screen: settings	Toggle switch unresponsive; preference not persisting; haptics still firing when disabled
16	Privacy Policy	profile_nav_tapped destination: privacy_policy, screen: settings	Tap does nothing (handlePrivacyPolicy is a console.log stub); no URL opened Note: handler is a stub — logs to console only, no actual navigation implemented
17	Support	profile_nav_tapped destination: support, screen: settings	Link fails to open; Linking.openURL error; alert shown to user
18	FAQ	profile_nav_tapped destination: faq, screen: settings	Tap does nothing (handleFAQ is a console.log stub); no URL opened Note: handler is a stub — logs to console only, no actual navigation implemented
19	Manage Subscription	profile_manage_subscription_tapped screen: settings	Alert not showing; "Contact Support" link in alert not opening; alert dismissed without action

#	Node	PostHog Events	QA
20	Delete Account	profile_delete_account_tapped screen: settings	Delete row not visible; haptic not firing; row unresponsive
21	Delete Confirmation Alert	profile_delete_account_cancelled screen: settings profile_delete_account_confirmed screen: settings	Alert not appearing; Cancel button unresponsive; Delete button hangs; re-entrancy guard blocks second attempt
22	Account Deleted + Redirect	user_session_out trigger: account_deleted, session_duration_seconds, had_selected_era user_account_deleted account_age_days, total_xp, adventures_completed	Clerk user.delete() fails; AsyncStorage clear fails; remembered accounts not cleared; paywall flag not removed; redirect to onboarding-step-1 fails Note: On failure, an alert with "Contact Support" link is shown
23	Sign Out	profile_sign_out_tapped screen: profile user_session_out trigger: manual_profile, session_duration_seconds, had_selected_era	Button unresponsive; Clerk signOut() fails; AsyncStorage.clear() fails; redirect does not happen; remembered account snapshot not saved
24	Redirect to Welcome Back or Onboarding	No new events — sign-out redirect is handled by router.replace(). Downstream screens (Welcome Back, Onboarding Step 1) handle their own analytics.	Blank screen after redirect; back gesture navigates to profile (should be blocked); remembered account data lost

Questions This Flow Answers

1. Strategic Questions

1. How many users visit the Profile tab per session?
2. How long do users spend on the Profile tab before navigating away?
3. How many users open the Settings sheet?
4. How many users sign out from the Profile tab?
5. How many users delete their account?
6. How many users interact with the expanded stat grid?
7. How many users explore the full Achievements screen?
8. How many users explore the full Monthly Badges screen?

2. Behavioral Insights

1. How many users tap "See more" to expand the stat grid?
2. How many users tap an achievement tile from the profile preview row?
3. How many users tap an achievement tile from the full Achievements screen?
4. How many users tap a monthly badge tile from the profile preview row?
5. How many users tap a monthly badge tile from the full Monthly Badges screen?
6. How many users tap the avatar (edit) area?
7. How many users toggle Background Music off?
8. How many users toggle Sound Effects off?
9. How many users toggle Vibration off?
10. How many users tap Manage Subscription in settings?
11. How many users tap Support in settings?
12. How many users tap Privacy Policy in settings?

13. How many users tap FAQ in settings?
14. How many users start the delete account flow but cancel?
15. How many users who open the Delete Confirmation alert follow through with deletion?
16. How many users who sign out land on the Welcome Back screen?
17. How many users who sign out land on the Onboarding Step 1 screen?
18. What is the average account age (in days) for users who delete their account?
19. What is the average total XP for users who delete their account?

3. Checkpoint Validation

1. **Profile Tab Viewed** — How many users see the profile screen each day?
2. **Badge Detail Card** — How many users open a badge detail card from either the preview row or the full grid?
3. **Monthly Badges Screen** — How many users navigate to the full 12-badge grid?
4. **Achievement Detail Card** — How many users open an achievement detail card from either the preview row or the full grid?
5. **Achievements Screen** — How many users navigate to the full 20-achievement grid?
6. **Settings Sheet** — How many users open settings from the profile?
7. **Delete Confirmation Alert** — How many users reach the native delete confirmation dialog?
8. **Account Deleted + Redirect** — How many users successfully complete the account deletion process?
9. **Sign Out** — How many users sign out from the profile screen?

Analysis Notes

- **Privacy Policy and FAQ are stubs:** The `handlePrivacyPolicy` and `handleFAQ` callbacks in `useProfileAccount.ts` only log to console — no URL is opened. These need real implementation before analytics wiring.
- **Avatar picker is a no-op:** `handleOpenAvatarPicker` in `profile.tsx` is an empty callback — the avatar edit button exists in the UI but does nothing on tap.
- **No profile-specific analytics exist today:** The only wired events are the generic `page_view` (from `startPageView/endPageView`), `user_session_out`, and `user_account_deleted`. Every interaction within the profile (settings toggles, achievement/badge

browsing, stat expansion) is completely untracked.

- **Sign out has two redirect paths:** If the user has a remembered account snapshot (userId + email), they redirect to `/welcome-back`. Otherwise they redirect to `/onboarding-step-1`. Tracking which path fires would reveal how many sign-outs are account-switches versus full logouts.
- **Delete account computes analytics before deletion:** The `user_account_deleted` event fires *before* `user.delete()` is called, which is correct — if it fired after, the PostHog user would already be reset. However, if the deletion fails, the event has already been sent (false positive).
- **manualSignOutInProgress flag:** Both sign-out and delete-account set `analyticsService.manualSignOutInProgress = true` to prevent the duplicate `clerk_session_ended` event from `_layout.tsx`. If this flag is not properly reset, subsequent auth state changes would be missed.
