

Archives — Daily Story Flow Spec

AFF-844 · PostHog Project 93650 · Generated 2026-04-30

- Normal

— event exists in codebase
- Red

— not in codebase, needs implementation
- Grey

— in codebase, not wired in flow
- Blue

— checkpoint
- Dark Grey

— alternate path (diagram)

User Journey

Events

#	Node	PostHog Events	QA
1	Today Tab Opened	<code>\$pageview</code> pageName: "today", screenUrl: "/(tabs)/today" Auto via analyticsService.startPageView / endPageView <code>daily_story_viewed</code>	Loading spinner stuck; quest data null

#	Node	PostHog Events	QA
		story_id, story_date, story_title, entry_source, is_today	
2	Calendar Week View	daily_story_calendar_swiped direction: "prev_week" "current_week" Not in codebase — needs implementation	Calendar dates misaligned; future dates tappable
3	Today's Story Home	daily_story_card_swiped from_card: number, to_card: number, direction: "left" "right" Not in codebase — needs implementation	Empty state for today; card deck not rendering
4	START MY DAY Tapped	daily_story_card_viewed story_id, card_index: 1 Fires via onCardViewed callback when openModal("video") called daily_story_started story_id, story_date, entry_source, is_replay: boolean Not in codebase — needs implementation. Distinct from daily_story_viewed (passive load vs active tap).	Hero dive animation freezes; modal doesn't mount
5	WATCH — Video Lesson	daily_story_media_played story_id, media_type: "video", media_id video_load_attempted video_url, content_type, cdn_domain, trigger: "auto" video_load_time load_time_ms, video_url, content_type, cdn_domain	Video black screen; HLS timeout; background music not playing
6	Reading Sheet Expanded	daily_story_reading_expanded story_id Not in codebase — needs implementation	Sheet doesn't open; swipe-to-close gesture broken
7	EXPLORE — Scrollable Lesson	daily_story_card_viewed story_id, card_index: 2 daily_story_media_played	Audio inner voice doesn't play; scroll content empty

#	Node	PostHog Events	QA
		story_id, media_type: "audio", media_id	
8	QUESTIONS — Quiz	daily_story_card_viewed story_id, card_index: 3 quiz_started adventureId: "daily_quest", moduleId: quest.id, erald: "daily_quest" Fired by Quiz component internally quiz_answer_selected question_index, selected_answer, is_correct Fired by Quiz component internally quiz_completed score, correct_answers, total_questions, adventureId: "daily_quest" Fired by Quiz component internally	Quiz modal opens without user auth; questions array empty
9	Quiz Results	daily_story_quiz_score story_id, story_date, score, correct_answers, total_questions Not in codebase — quiz_completed fires but daily-story-specific score is not tracked	Results screen stuck; stars don't animate
10	Story Completed	daily_story_completed story_id, story_date, time_spent_seconds, entry_source daily_story_streak_incremented story_id, current_streak, is_first_action_today In codebase (AnalyticsService + useDailyStoryTracking) but trackStreakIncremented is never called from today.tsx	Completion not saved to Supabase; streak not updated

#	Node	PostHog Events	QA
11	Celebration Screen	daily_story_celebration_shown story_id, story_date, xp_earned Not in codebase — needs implementation daily_story_celebration_dismissed story_id, dismiss_method: "continue" "close" Not in codebase — needs implementation	Rive animation doesn't load; celebration never appears
12	Dismiss / Back (from WATCH or EXPLORE)	daily_story_dismissed story_id, time_spent_seconds, scroll_depth_pct, cards_seen, completed Fires on hook unmount (story change or tab switch)	Close animation stutters; modal stays mounted
13	Historical Story Loaded (subscriber)	daily_story_rewind_tapped story_date, is_subscribed: true, days_ago daily_story_viewed story_id, story_date, entry_source: "rewind", is_today: false	Supabase query fails; spinner stuck on historical date
14	Rewind Blocked — Paywall Shown	daily_story_rewind_tapped story_date, is_subscribed: false, days_ago daily_story_rewind_blocked story_date, days_ago subscribe_screen_viewed trigger: "daily_story_rewind" subscribe_purchase_completed trigger: "daily_story_rewind", plan: "yearly" On successful purchase subscribe_purchase_cancelled trigger: "daily_story_rewind" On user cancel subscribe_purchase_failed trigger: "daily_story_rewind", error_code	Paywall not presented; purchase race condition with history reset

#	Node	PostHog Events	QA
		On error or NOT_PRESENTED	
		subscribe_restore_success	
		trigger: "daily_story_rewind"	
		On successful restore	

Questions This Flow Answers

Strategic Questions

1. How many users open the Today tab each day?
2. How many users who open the Today tab tap START MY DAY?
3. How many users complete the full daily story (all 3 sections)?
4. How many users drop off after WATCH without continuing to EXPLORE?
5. How many users drop off after EXPLORE without starting QUESTIONS?
6. How many users return to a completed story and replay it?
7. How many users tap a past date on the calendar (rewind)?
8. How many non-subscribers hit the rewind paywall?
9. How many users purchase a subscription through the daily story rewind paywall?

Behavioral Insights

1. How many users expand the reading sheet during WATCH?
2. How many users play the inner voice audio during EXPLORE?

3. How many users use the back button to revisit a previous section?
4. How many users dismiss the story from the WATCH section?
5. How many users dismiss the story from the EXPLORE section?
6. How many users swipe between cards on the home deck before starting?
7. How many users view the celebration screen to completion?
8. How many users close the celebration screen early?
9. How long do users who complete the story spend on it?
10. How long do users who abandon the story spend before leaving?
11. How many users have their video fail to load?

Checkpoint Validation

1. **Today Tab Opened** — How many users open the Today tab?
2. **START MY DAY Tapped** — How many users actively start the daily story?
3. **WATCH** — How many users play the video lesson?
4. **EXPLORE** — How many users reach the scrollable reading section?
5. **QUESTIONS** — How many users reach the quiz?
6. **Story Completed** — How many users finish the full daily story?

Analysis Notes

- **Exclude background dismissals** — `daily_story_dismissed` fires on hook unmount, which includes app backgrounding and tab switching. Filter by `completed: false AND time_spent_seconds > 5` to isolate intentional abandons.
- **Replay detection** — When progress is 100%, the button reads "RESTART MY DAY" and opens the video modal. There is no separate event for replay vs. first play. Proposed `daily_story_started` includes `is_replay` to distinguish.

- **Streak tracking gap** — trackStreakIncremented exists in useDailyStoryTracking and AnalyticsService but is never called from today.tsx. Wire it in handleQuizComplete or reportTodayComplete.
 - **Rewind paywall deduplication** — subscribe_screen_viewed fires once per paywall presentation (re-entrancy guarded by isPaywallPresentedRef). Multiple calendar taps during presentation are blocked.
 - **Card viewed debouncing** — daily_story_card_viewed fires once per card per session (tracked via cardsSeenRef Set). Story ID change resets the set.
 - **Historical content** — When a subscriber loads a past date, daily_story_viewed fires with entry_source: "rewind" and is_today: false. The same tracking hook is reused for both flows.
